Технические характеристики на машины для упаковки в пленку ASL-200A, ASL-300B, вакуумные упаковочные машины DZ-6002S компании Aslan

BOPP Film Packing Wrapping Machine

This machine is suitable for automatic film packaging (with gold wire) of single box items in various industries.

Model:ASL-300B

Brand:aslan

Product Description

Automatic 3D box cellophane film wrapping packing machine

This machine is suitable for automatic film packaging (with gold wire) of single box items in various industries.

This machine is an excellent choice for small box packaging. It can provide a beautiful product display effect.

Let the product become high-end so that customers have the desire to buy, Perfect for cigarettes, cosmetics, perfumes, nail polishes, pharmacies, pokers, condoms, CD etc.

It can play the role of moisture-proof, dust-proof and anti-counterfeiting, and improve the packaging grade of products and increase the added value of products. SCOPE OF APPLICATION

This machine is an ideal equipment for three-dimensional packaging of cardboard boxes and products with BOPP film.

Suitable for automatic packaging of cigarettes, medicines, cosmetics, perfumes, food, playing cards, stationery, condoms, CD etc.

MAIN FEATURES

1. Adjustable packing speed: This machine adopts frequency conversion adjustment device, which can change the packing speed according to different work requirements.
2. The range of packaging size is adjustable: when the size of the packaged product changes, the machine only needs to replace the mold and make appropriate adjustments.
3. Adjustable heat sealing temperature: it can set the heating temperature according to the change of the external climate, and can keep it within the set temperature range.
4. Feeding device: It is composed of a combination of a feeding tray and a hopper, and the stacking type continuously feeds.

Name	Automatic Cellophane Film Wrapping Box Machine	
Model	ASL-200A	ASL-300B
Power supply	220v 50/60hz	220v 50/60hz
Motor Power	3.45kw	4.25kw
Packing Speed	40-80 box/min	40-100 box/min
Packing Box Length	50-160 mm	50-280 mm
Packing Box Width	20-100 mm	20-150 mm
Packing Box Height	8-50 mm	10-80 mm
Machine Weight	600kg	650kg
Machine Dimensions	2000*790*1550 mm	2300*840*1550 mm

Vacuum Packing Machine

vacuum packing machine with nitrogen filling function . stainless steel material . suitable for snack food , meat , grain and so on

Product Description

vacuum packing machine for snack food , meat ,grains .

machine introduce :The double-chamber food vacuum packaging machine uses a vacuum cover to work alternately on two vacuum chambers to achieve the purpose of improving work efficiency. When one vacuum chamber is vacuuming, the other vacuum chamber can place packaging; vacuum cover The labor-saving device with swing design greatly reduces the labor intensity of the operator.

machine working principle & machine feature :

1. Vacuum: 2. Heat sealing: 3. Return air: 4. Circulation

The main function of the vacuum packaging machine is to remove oxygen to help prevent food spoilage. The principle is relatively simple. The mildew and spoilage of food is mainly caused by the activities of microorganisms, and the survival of most microorganisms (such as molds and yeasts) is required Oxygen, and vacuum packaging uses this principle to extract oxygen in the packaging bag and food cells, so that microorganisms lose their living environment. Experiments have shown that when the oxygen concentration in the packaging bag is $\leq 1\%$, the growth and reproduction speed of microorganisms will drop sharply, and when the oxygen concentration is $\leq 0.5\%$, most microorganisms will be inhibited and stop reproducing. Another important function is to prevent food oxidation. Because fats and oils contain a large amount of unsaturated fatty acids, they are oxidized under the action of oxygen, which makes the food taste and deteriorate. In addition, oxidation also causes the loss of vitamin A and C, and the instability of food pigments. The substance is affected by oxygen to darken the color. Therefore, deoxygenation can effectively prevent food from spoiling. In addition to the oxygen-removing and quality-preserving functions of vacuum packaging, vacuum inflatable packaging also has the functions of anti-compression, gas barrier, and preservation, which can more effectively maintain the original color, aroma, taste, shape and nutrition of the food for a long time. value. In addition, many foods are not suitable for vacuum packaging and must be vacuum-filled packaging. Such as crunchy and fragile foods, foods that are easy to agglomerate, foods that are easy to deform and run out of oil, foods with sharp edges or corners or high hardness that will pierce the packaging bag, etc.

machine technical parameter :

model	DZ-6002S
capacity	2-5 cycle/mintues
motor	2.5kw
voltage	380v 50hz
chamber size	690*620*160mm
machine size	1400*720*950mm
machine weight	300kg
hs code	8422400000
